

Using TIIG to enhance the Joint Strategic Needs Assessment – Focus on Falls

Richard Jones
Lead Public Health Epidemiologist
Liverpool City Council

JSNA – Falls & Fragility Fracture (Jan 2018)

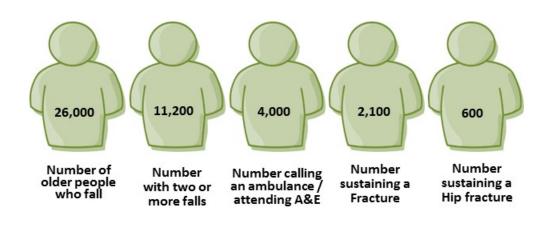

- Falls mortality rate among older people is the second highest in England
- 28% increase since 2001.
- Highest emergency admissions for falls in older people
- Widening inequalities gap
- Cost of falls is conservatively estimated at £9M per annum in the city

JSNA analysis without TIIG data

Estimates show that around 4,000 people aged 65 and over in Liverpool will call an ambulance each year and a similar number will attend Accident and Emergency (A&E).

Analysis using TIIG data – Enhanced Data

- In 2016/17 there were 6,828 ambulance callouts due to falls in Liverpool.
- People aged 65 and over accounted for 4,057 (59%) of callouts.

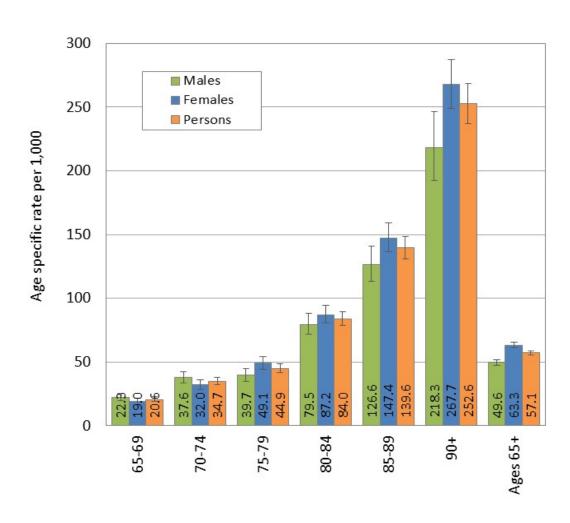

Analysis using TIIG data

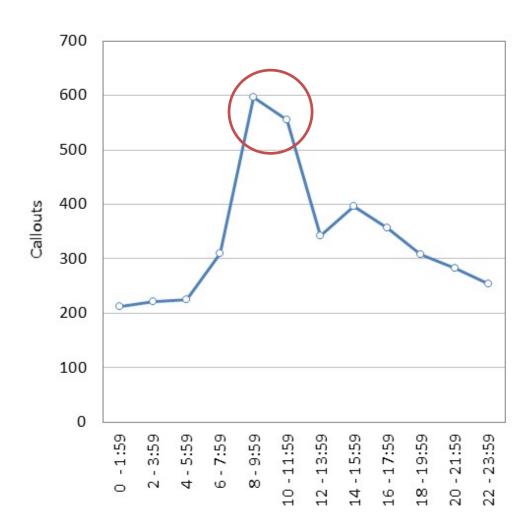

- Callout rates per 1,000 residents ages 65+ were significantly higher in females compared to males.
- Callout rates generally increase with increasing age.

Analysis using TIIG data

 Ambulance callouts for falls among older people were at their highest in the mornings with those made between 0800 and 1200 hours accounting for more than a quarter of callouts (28.4%).

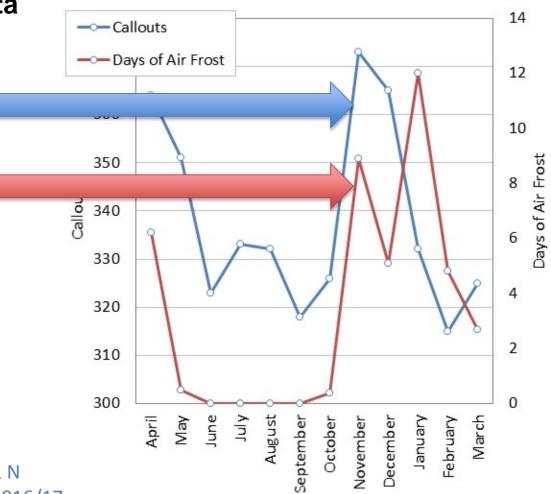

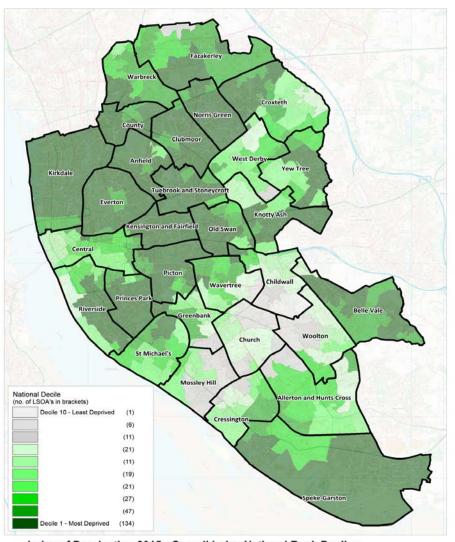

Analysis using TIIG data

 Ambulance callouts for falls increased sharply in November.

 This corresponded with a sharp increase in average monthly days of air frost.

Key Points

- The TIIG data is being used to enhance telehealth provision e.g. link with falls and getting out of bed.
- LCC is using the information the information to help with targeting the Healthy Homes Service.
- Falls prevention in care homes to reduce hospital admissions.
- Routine screening of service users for their risk of falls.
 Community Care Teams are screening to keep people safe at home.
