

## **Leighton Hospital Emergency Department** Monthly Bulletin: January to December 2010

This bulletin provides a breakdown of all injury attendances at Leighton Hospital Emergency Department (ED) between January and December 2010.

Between January and December 2010 there were 39,169 injury attendances. Injury attendances peaked in June (n=3,829), with February (n=2,454) having the least number of injury attendances (Figure 1).

For all months there were more male injury attendances than female presenting at Leighton Hospital ED (55%).

Figure 2 presents the age group of injury attendances. Across the whole year the majority of injury attendances were made by individuals aged 30-59 years.

**Table 1** details the injury group of injury attendances. The majority of injury attendances

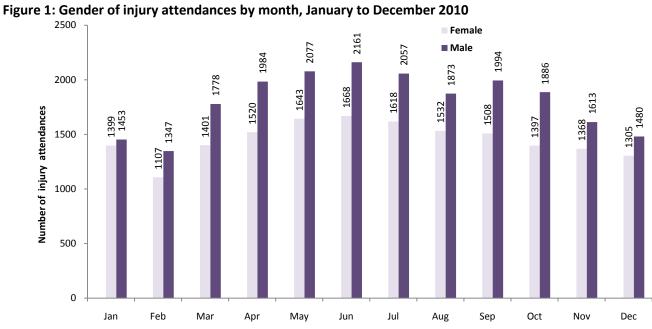

were classified as 'other injury' (86%); 5% were recorded as road traffic collisions (RTCs) and 3% assaults.

**Table 2** illustrates the source of referral for patients presenting with injuries. The majority (71%) of injury attendees self-referred.

Table 3 presents injury attendances by location of incident. A third (33%) were recorded as occurring in a public place and 29% in the home.

**Table 4** shows the discharge destination of injury attendances. Almost seven in ten of attendees were discharged (68%).

Assault attendees presenting at Leighton Hospital ED between January and December 2010 were mainly male (72%) and the majority (44%) were aged between 18 and 29 years of age. Table 5 shows the primary location of assault was recorded as occurring in a public place (41%).

<sup>1 \*\*\*</sup> Please note that all numbers less than five have been suppressed in line with patient confidentiality and if there is only one number in a category then two numbers will be suppressed at the next level (e.g. <6) in order to prevent back calculations from totals.

2 \*\*\* Due to low numbers and patient confidentiality firework injuries have been categorised under other injury
