

MONTHLY BULLETIN: OCTOBER 2013 TO SEPTEMBER 2014

This bulletin provides a breakdown of all injury attendances to Rochdale Infirmary Emergency Department (ED) between October 2013 and September 2014.

During this twelve month period there were 21,405 injury attendances to the ED. The month with the highest number of attendances, calculated as a daily average, was June 2014 (73 per day) with December 2013 having the lowest attendances (50 per day; **Figure 1**).

Males accounted for over half (53%) of all injury attendances (**Figure 1**). The highest proportions of attendances were for those aged between five and 19 years (28%) and between 20 and 34 years (23%; **Figure 2**).

The majority (70%) of injury attendances were recorded as other injuries. Falls accounted 15% of injuries, followed by 6% caused by road traffic collisions (RTCs; **Table 1**).

Close to three in ten (27%) fall attendees were aged 65 years or over, half (50%) of deliberate self-harm (DSH) attendees were aged between 20 and 34 years and over four in ten (43%) RTC attendees were aged between 20 and 34 years (**Figure 3**).

Table 2 shows the ethnicity of injury attendees to Rochdale Infirmary Hospital ED. The majority (72%) were White.

The disposal of a patient can give an indication of the severity of the injuries sustained. Over six in ten (65%) attendees were discharged, almost a third (32%) were referred for further treatment and 2% were admitted to hospital (**Table 3**). Seven in ten (70%) RTC attendees were discharged, 57% of burns and scald attendees were referred for follow-up treatment and 12% of DSH attendees were admitted to hospital (**Table 4**).

Table 5 shows the arrival method of attendances to Rochdale Infirmary ED. Three-quarters (75%) of attendees arrived by private transport.

Table 6 shows incident location and injury group. Of all injuries, close to half (49%) occurred in the home while 12% occurred in a public place. Thirty-five per cent of assaults occurred in a public place and 70% of DSH injuries occurred at home.

Assault attendances

Between October 2013 and September 2014 there were 547 assault-related injury attendances to Rochdale Infirmary ED.

Close to seven in ten (68%) were male and four in ten (40%) were aged between 20 and 34 years. Over a third (35%) of assaults occurred in a public place (**Table 7**).
