

Injury attendances to Royal Bolton Hospital Emergency Department

April 2013 to March 2014

This report summarises recorded injury attendances to Royal Bolton Emergency Department (ED) between April 2013 and March 2014.

Between April 2013 and March 2014 there were 45,919 injury attendances to Royal Bolton ED. Males accounted for over half (52%) of these attendances. The month with the highest attendances was July (n=4,320) with February having the lowest (n=2,796) (Figure 1). Of the specified injury groups, falls (8%) accounted for the highest proportion followed by road traffic collision (RTC) and sports injury (both 3%) (Table 1).

The highest proportion of attendances was for persons aged 20 to 34 (24%); Ages 65+, 35-49 and 5-19 each represented 18% of attendees. (Figure 2). Almost half (47%) of fall attendees were aged 65 or over while over a quarter (26%) of burns and scalds injuries were sustained by 0 to 4 year olds. Four in ten (40%) of RTC attendees were aged 20-34 (Figure 3).

Table 2 shows the ethnicity of attendees to Royal Bolton ED. Over seven in ten (72%) were white.

The disposal of a patient can give an indication of the severity of the injuries sustained. Four in ten (40%) were discharged and 18% were admitted (Table 3). Over half (53%) of burns and scalds attendees were referred and 39% were discharged, while over one-

third (34%) of deliberate self-harm (DSH) attendees were admitted. Half (50%) of assault attendees were discharged. A quarter (25%) of fall attendees were admitted (Table 4).

Table 5 shows the arrival methods of attendances at Royal Bolton ED. Three-quarters (75%) of attendees arrived on foot, whilst a quarter (25%) arrived by ambulance.

Table 6 shows the location of the incident of the main injury groups (excluding other injury). Over six in ten (61%) injuries occurred in the home. Almost four-fifths (79%) of burns and scalds occurred in the home. One quarter (25%) of sports injuries occurred in an educational establishment.

Table 7 presents data for assault attendees to Royal Bolton ED. Males represent almost seven in ten (69%) of assault attendences, whilst almost half (46%) of assault attendees were aged 20 to 34. Almost half (47%) of assault attendees arrived by ambulance.
