October 2012 to September 2013

This report summarises recorded injury attendances to Trafford General Emergency Department (ED) between October 2012 and September 2013.

Between October 2012 and September 2013 there were 56,285 injury attendances to Trafford General ED. Females accounted for just over half (51%) of all injury attendances. The month with the highest injury attendances was July (n=5,357) with February (n=4,270) having the lowest attendances (Figure 1). The majority of attendances were recorded as other injury (93%). Sports injury accounted for 3% of all injury attendances and road traffic collisions (RTC) 2% (Table 1).

For all injuries the highest proportion of attendances were for persons aged 20 to 34 and 65 plus years (both 21%) (Figure 2). Over four in ten (42%) RTC attendees were aged 20 to 34 years. Almost half (49%) of sports injury attendees were aged 5 to 19 years (Figure 3).

Table 2 shows the ethnicity of attendees to TraffordGeneral ED. Almost nine in ten (87%) were white.

The disposal of a patient can give an indication of the severity of the injuries sustained. Almost two-fifths (39%) of attendees were discharged, a third (33%) were referred and 14% were admitted to hospital (Table 3). Over six in ten (62%) of RTC attendees were discharged. Over half (51%) of sports injury

attendees were discharged, while almost a third (32%) of deliberate self-harm (DSH) attendees were admitted (Table 4).

Table 5 shows the arrival methods of attendances atTrafford General ED. Most (85%) of attendees arrivedby other means, whilst 15% arrived by ambulance.

Table 6 shows assault attendances to Trafford General ED. There were 522 assault attendances recorded between October 2012 and September 2013. Seven in ten (70%) were male, and over four in ten (44%) were aged 20 to 34 years. Almost a quarter (24%) of assault attendees arrived at the ED by ambulance.
