

This bulletin provides a breakdown of all trauma<sup>1</sup> attendances at Alder Hey Accident and Emergency (A&E) department between April 2007 and March 2008.

Figure I illustrates the number of trauma attendances by month of attendance. The peak month for trauma attendance was April (n=2207), with December (n=1232) accounting for the lowest number of trauma attendances.

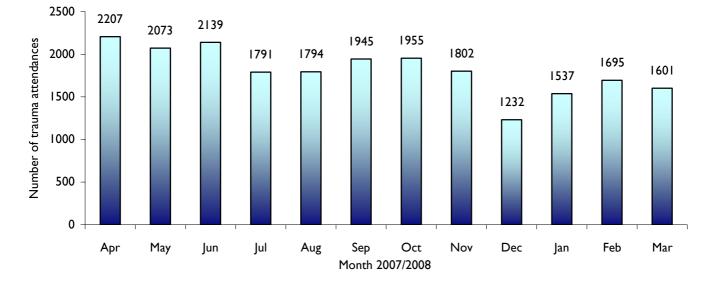

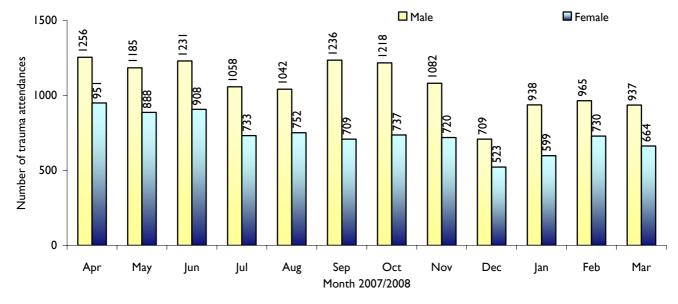

Figure 2 gives a breakdown of trauma attendances by gender. For each month there were more male trauma attendances than female presenting at Alder Hey A&E department.

Figure 2: Gender of trauma attendances by month, April 2007 to March 2008

<sup>1</sup> Trauma relates to all A&E attendances presenting as a result of an accident or intentional/unintentional injury.

Figure 3 illustrates age group of trauma attendances. Patients aged 10 to 14 years were the largest group of trauma attendances at Alder Hey A&E department between April 2007 and March 2008.

## Figure 3: Age group of trauma attendances by month, April 2007 to March 2008

Table I details the injury group of trauma attendances. The majority (92%) of trauma attendances between April 2007 and March 2008 were recorded as Trauma – Accidental. This can cover incidents such as a body injury or laceration.

## Table I: Trauma attendances by injury group, April 2007 to March 2008

				10	,	-
